PROJECTS

DocTalk -- (MERN stack, ReactJS, SCSS and MongoDB)

- An interactive WebApp for booking doctor appointments with easy navigation, skipping the long waiting phone calls

Mocha-Chai Unit Testing -- (REST API Testing)

- The module consist of tests related to handling of creating a user, deleting a user, getting information of all the users and updating users with complete and missing information use cases.

Credit Card Fraud Detection -- (Jupyter Notebook)

- Data Analysis, with a GUI implemented with 'tkinter', designed to predict a transaction as a normal or a fraud transaction using machine learning models.

Time Series Analysis -- (Regression models)

- The module recognises the highest performing stores and perform predictions on sales with help of linear regression models.
